PEBBLES FOR GRINDING MILLS.

Formerly Imported From Denmark, Supply Now Found in America.

Pulverizing by pebbles in rotating cylinders or grinders is practiced in the United States in the manufacture of cement, in the metallurgy of gold and silver ores and in preparing for industrial use feldspar, quartz and certain mineral pigments.

For this grinding nearly \$500,000 worth of small stones was imported in 1914. Well rounded pebbles from 1 1/2 to 4 inches in diameter are preferred, and nearly half of the supply has been flint pebbles from Denmark, though small quantities have been furnished by many parts of Europe and British America. Since the Danish imports have been threatened by the war, some search has been made for a home supply. The geological survey reports suitable pebbles of flint in the Gulf States, of quartz from Amador county, California, of quartzite and granite from Lake Superior, of rhyolite and basalt from the Rocky mountains and of rhyolite and felsite from Massachusetts and Maine, and some of these have been successfully tried. Artificially prepared pebbles also have given good results. Balls of cast iron and of porcelain have proved unsuitable, but at Manhattan, Nev., angular blocks of dense rhyolite have been roughly rounded in a revolving chamber into pebbles as efficient as the Danish. An Oregon gold mine and a cement mill at Arrowrock dam have satisfactorily used angular blocks of basalt.

SIMPLIFIED PHOTOGRAPH.

New Method Has Several Advantages, Among Them Economy.

In the novel method of enlarging photographs lately patented by A. J. Lotka, the view is widened out first in one direction and then at an angle of 90 degrees to that direction. The negative is made to slide past an illuminated slit, and at the same time a sensitive plate under the negative is moved in the same direction at some multiple of the rate of speed. When the sensitive plate is developed, the positive transparency obtained is found to have unaltered all lines parallel to the slit during exposure, while all lines at right angles to the slit are magnified in the ratio of the speed of the sensitive plate to that of the negative. This positive then takes the place of the negative in the second stage of the process. Another sensitive plate is placed under it, and these two plates are moved across the slit in the same ratio of speed maintained before, but at right angles to the former direction. The result is a negative enlarged both ways. It is free from distortion and is claimed as uniform illumination, simplicity of the process and low cost of the apparatus required.

POLITICAL ADVERTISEMENTS

MR. PRICE DENIES REPORT

Having learned that it is being circulated throughout the county by some of my enemies that I am in a Blease combination, I take this method of denouncing publicly as false and utterly without foundation any such report. I am making the race for Auditor and County Superintendent of Education absolutely on my own merits as a business man and citizen and not as a coat-tail swinger. I have not had and will not have anything to do with any other race. Any voter who has any doubts as to the way I will vote for governor on September 12th may learn if he will inquire from any of my intimate friends, as my attitude in this respect has long been known by those who know me well.

E. L. Price.

CARD OF THANKS.

I wish to take this method of expressing my thanks to the voters of Ehrhardt and Three-Mile townships for the handsome vote given me in my race for reelection as magistrate at Ehrhardt. I appreciate the fact that I have been nominated on the first ballot, and I assure the people that I shall continue in the future as in the past to give them my best services.

J. H. KINARD.

TO THE VOTERS OF BAMBERG COUNTY.

I desire to take this method of expressing my sincere appreciation for the magnificent vote given me in the primary just passed, and to thank my friends for their loyalty and support. While I needed only one vote to place me in the second race, still I am very proud that I led the ticket at my home precinct and at three others. Again thanking one and all, I am,

Sincerely,

H. D. FREE.

CARD OF THANKS.

I wish to thank the people of the Bamberg magisterial district for the handsome vote given me in the primary election last week. In my administration of the office I shall endeavor to give the people the best service possible.

E. DICKINSON.

CARD OF THANKS.

I wish to take this method of expressing my sincere thanks to the voters of the county for the handsome vote given me in the primary. While not elected, I appreciate the vote I received just as much. I wish to also at this time announce to the voters that I will be a candidate for sheriff four years hence, and will at that time again ask the support of my friends.

D. J. DELK.

TO THE VOTERS OF BAMBERG COUNTY.

I take this means of thanking you, one and all, for the handsome vote given me on August 29 for Auditor and Supt. of Education, and being in the second race, would ask you to once more come to the polls and stand by me on September 12.

Cordially,

E. L. PRICE.

CARD OF THANKS.

Editors The Herald:—Allow me space in your paper to extend to the Democratic voters of Bamberg county my heart thanks for their generous support in the recent primary election. I did not get enough votes to nominate me, it is true, but I am highly grateful to my friends for the handsome vote I did get. Very truly,

FRANCIS F. CARROLL.

An Expired License.

An exchange has the nerve to quote:

The year's at the spring,
And day's at the morn;
Morning's at seven;
The hill-side's dew-pearled;
The lark's on the wing;
The snail's on the thorn;
God's in His heaven,
All's right with the world.

Except—England, France, Germany, Austria, Russia, Japan, Serbia, Bulgaria, Turkey, Greece, Portugal, Australia, Roumania, Canada, Belgium, Sweden, Norway, Spain, Italy, New Zealand, Finland, Poland, India, Egypt, South Africa, Newfoundland, Mexico—and US!

We may have forgotten a few, having forgotten some of our geography.

But even Browning couldn't get a license for that, in this day and generation!—Raleigh Times.

Namiquipa, Mexico, which covers an area of 444 square miles, is claimed to occupy the largest area of any town in the world.

TO THE VOTERS OF BAMBERG COUNTY.

I wish in this way to convey to you my heartfelt appreciation for the support you gave me on the 28th of August, and to ask a continuance of your support on the 12th of September. You know that I have always left it with you to say whether or not I should continue to serve you as County Auditor.

Now, after years of faithful service, I have faith and confidence enough in you to believe that you will not lay me aside now, because God has seen fit to lay his hand of affliction upon me. If I ever needed your support now is the time, when I am unable to do anything else, and I believe that you are going to stand by me. "A friend indeed is a friend in need."

I have always looked after your interest in seeing that your property was not assessed "any higher than that of other counties. I have not forgotten your schools, no, not even during my illness, and the school fund of the county is better off by \$1,000 or more by my thinking than when you had forgotten them yourselves, and as long as I remain in the office I shall continue to take care of your interests.

I regret very much that I was unable to attend all of the county campaign meetings and shake hands with you as usual, but I have had the pleasure of seeing a great many of you here.

My condition is so much better than it has been that I believe God in his goodness is going to restore me to health again. What I need now is absolute rest of both body and mind, neither of which I have had since I came home from the hospital. Scarcely a day has passed that I have not done work of some kind, and some of it very strenuous work, enough to tire a well man, to say nothing of a sick man.

Therefore, should any of you have cast your ballot against me on account of my health, I hope you will reconsider the matter and vote for me this time.

Again thanking you for your past support, and asking a continuance of the same on the 12th inst., I am,

Your servant,

R. W. D. ROWELL.

Sept. 5, 1916.

TO THE VOTERS OF BAMBERG COUNTY.

I want to thank you for the nice vote you gave me in the first race and to assure you I appreciate same very highly.

I am to make the second race by a very close margin.

Rumors are always started to injure a person, and I am sorry to say there are already rumors afloat that I have used money and whiskey to influence votes and that I am a heavy whiskey drinker.

I will pay a nice reward for any one to prove the charges before a committee of five responsible, reliable men. I had no connection in any way with the use of whiskey in the last election.

There may be and doubtless are other false and malicious reports being circulated against me, which shows to what extent my enemies will go to try to defeat me. I only ask that any report be thoroughly investigated before it is believed.

I am in no combination with any one, and am running this race as a gentleman, and will appreciate any help you can lend me in my coming election.

This notice may not reach everyone, so would appreciate it very much if this news will be passed on. Yours very respectfully,

J. D. COPELAND, JR.

CARD OF THANKS.

I wish to express to the voters of Bamberg
